

2011 Ethics Science Fair Awards

Yichen Song and Sophia Wang, 3rd place

11th Grade, Torrey Pines High School

“As humans, we have the unique lust for learning. From this drive stemmed science, man’s source of uncovering facts and answers to explain our natural and mysterious world. Nevertheless, there are questions, especially in the biological field, that cannot be objectively answered by science.....As humans, we also have the ability to judge what we think is right or wrong, but animal research is no clear black and white picture.”

- Y. Song & S. Wang *in* Ethical Issues Involved in Animal Research for Treatment of Human Disease and Possible Solutions
